Projects

Covid-19 awareness and alertness on mobile applications
- The main idea behind the project development was to try and improve covid-19 information awareness through the use of mobile phones as almost everyone has access or owns a mobile phone.

- The project was developed using python open-source libraries; pandas, matplotlib, beautifulsoup, kivymd, kivy-garden

Social media web app which can be a twitter blog, Instagram all anything else
- The social media web app gives the users the ability to register, login, password reset, add post, comment to post, like post or comments, reply to comments, follow other users, unfollow, like or dislike a post or comment, show notifications. Visit https://github.com/westly93 for more projects.

EXPERIENCE

Industrial attachment. Bindura Municipality. June 2019 to August 2020

- Supported and maintained the ICT infrastructure for shared services, and provided remote support for various issues with Windows Servers and Desktops.

- Investigated and resolved network related problems, and assisted users with related issues
